

Automated Shades

Solutions that put you in control of your light

 LUTRON

The transformative power of light

Think about how your mood changes when a drab, cloudy morning turns into a sun-kissed day, and then that bright afternoon sun softens into a dusky evening. You go from feeling lackluster to energised and then relaxed.

Light energises life.

Light not only changes the look of the day but also affects the way you feel. Wouldn't it be nice to adjust the amount of daylight in your home to complement your mood and even help transform it?

With Lutron Shading Solutions, you have the power to do that. The press of one button can shape the lighting in a space to create the perfect atmosphere for any activity.

The Lutron difference

- Over 20 years of experience and knowledge in the automated shading industry, Lutron is the world leader in precision-controlled, automated blinds
- Provides the entire shading solution — the blind itself, electronic drives, controls, power supplies, and hardware — ensuring the highest-quality products and a satisfying customer experience
- Broad breadth of line, with eight blind styles and over 1,000 materials and fabrics for any budget or application
- Collaboration with world-leading textile manufacturers to offer only the highest quality fabrics and materials
- Exceptional attention to detail for functional — and beautiful — controls, and a wide selection of styles, colours, and finishes
- Seamless integration of daylight, electric light, security systems, and HVAC systems for total home control solutions that allow for a more curated environment
- Works with best-in-class home solutions to provide ultra-reliable blind (and light) integration with your favorite brands
- Global 24/7 customer support

ROLLER BLINDS

Roller blinds

Sivoia QS roller blinds complement both traditional and contemporary designs and are available in different sizes to accommodate the needs of any room. Sivoia QS blinds are hard-wired solutions.

Precision control

All Lutron blinds feature intelligent hembar alignment, which was designed to synchronise all automated blinds in a single room or an entire home.

Pocket (recessed into the ceiling) — offers blackout capability for the window and a protective enclosure for the entire blind system.

Fascia (decorative cover) — conceals the roller and is ideal for more conventional spaces as a square profile.

Note: For Customers Own Material (COM), please contact EAWindows@lutron.com.

ROLLER BLINDS

Battery-powered roller blinds

Battery-powered blinds are simple to install, easy to maintain, and ideal for areas that require a wire-free solution.

Battery basics

Triathlon battery-powered roller blinds feature industry-leading battery life and use replaceable, store-bought batteries. Innovative headrail design makes batteries easy to access and change.

Blind sizes

Available in configurations up to 3.6m wide by 3.6m tall.

Fascia options for battery-powered blinds

Architectural — provides a clean and contemporary aesthetic for spaces that require a modern finish.

Fabric-wrapped — ideal for applications with a more traditional design aesthetic, fabric-wrapped fascia provides a finished look with fabric to match your blinds.

Exposed standard — this slim profile can be hidden with custom top treatments.

Exposed WIDR — this profile can be concealed with a custom top treatment or left uncovered for an industrial aesthetic.

PALLADIOM ROLLER BLINDS

Palladiom roller blinds

The Palladiom Shading System redefines the beauty of daylight control. Available as a wired or wire-free, battery-operated system, these blinds look beautiful from every angle and are designed to be installed without a fascia, pocket, or recess in exposed applications.

Palladiom bottom rail

Designed to fit anywhere

Palladiom wired blinds seamlessly blend into any architectural style. Mount on or above the window frame to highlight the handsome end bracket, or tuck jamb brackets elegantly inside the frame.

End bracket

Centre bracket

Jamb bracket

Wire-free flexibility

The Palladiom Wire-Free Shading System brings battery-powered flexibility to the performance and craftsmanship of the Palladiom Shading System.

Lutron's industry-best battery performance delivers 3–5 years of battery life on six, D-cell batteries.

Fabrics for roller blinds

Choose from the highest quality fabrics and materials from world-leading textile manufacturers.

Sheer

- Open weaves preserve views to the outside and filter sunlight

Translucent

- Tighter weaves transform harsh daylight into a soft, filtered glow

Blackout

- Opaque fabrics block light from entering a space

Curtain track systems

Curtain track systems electronically operate pinch pleat or S-Fold curtains to provide elegant, quiet, and convenient daylight control. All Lutron curtains are made with Customer's Own Material (COM) to allow your window treatments to coordinate with the interior's other textiles and furnishings.

Drapery sizes

Lutron curtain track systems provide a wide range of options to suit your needs. Our systems allow for tracks up to 9 meters long, single or multi-bend curved tracks, manual-open override, track splicing, and curves with standard 300mm bend radius.

Straight-track system

The straight track system is available in the following configurations:

- Single or dual track
- Standard single track with lengths up to 5.4 meters; with up to 9 meters spliced

Curved track

Lutron curtain track can be custom-curved to fit a curved wall, bay window, and many other special applications.

- 7 standard bends/curves available

Pleat styles

Pinch pleat — named for the pleated look created by pinched gatherings of the fabric at the top of the curtain. When installed, pins on the back of the curtain are simply looped through the carriers on the track.

S-Fold — named for the soft, consistent ripples created by the curtain as it hangs from the track. Fullness of the curtain is determined by the carrier spacing. Lutron S-Fold tracks are available in 60 mm and 80 mm options.

Mounting options

Choose from wall or ceiling mount. Tracks can be mounted in a cove or recessed into the ceiling.

HORIZONTAL SHEER BLINDS

Horizontal sheer blinds

Horizontal sheer blinds pair the soft elegance of a sheer with the precise control of a blind.

Fabric vanes tilt in precise increments between open and closed positions, aligning perfectly across adjacent blinds.

WOOD BLINDS

Wood blinds

Wood blinds are an attractive and effective way to ensure privacy while still allowing sunlight to filter into a space. Only Lutron wood blinds offer independent lift and tilt for precision alignment of both height and angle positions between multiple blinds.

Preset

Open tilt

Closed

WOOD BLINDS

Battery-powered wood blinds

Triathlon battery-powered wood blinds feature Natural Light Optimisation*, an advanced technology that allows blinds to automatically tilt to strategic angles throughout the day based on the sun's position in the sky. The result is diffuse, direct sunlight that maximises comfortable daylight. Schedules will adjust as the seasons change. These blinds feature a customised bottom rail so you can easily, manually lift or lower the blinds when necessary.

Finishes

Handcrafted, 5-cm wood slats are made from genuine North American Basswood. Available in 12 stained and 6 painted finishes to complement any interior.

Battery basics

Triathlon battery-powered wood blinds feature industry-leading battery life and use store-bought batteries. Innovative headrail design makes batteries easy to access and change.

Note: Triathlon battery-powered wood blinds are not available in Canada.
*Works with Caséta, RA2 Select, RadioRA 3, and HomeWorks systems with QSX processors

Honeycomb blinds

Triathlon battery-powered honeycomb blinds are a traditional blind style, easy to maintain, and ideal for areas that require a wire-free solution.

Honeycomb blinds come in varying opacities, from light-filtering to room darkening, allowing you to achieve the optimal level of light control and privacy for your space. In addition, all insulated honeycomb blind fabrics have a white backing that acts as a reflector to help keep your space cool and comfortable. With these dual-sided fabrics, you can give each room a signature look while maintaining a uniform appearance from the outside.

Battery basics

Triathlon battery-powered honeycomb blinds feature industry-leading battery life and use store-bought batteries. Innovative headrail design makes batteries easy to access and change.

Cable-guided options

Cable-guided honeycomb blinds move smoothly and quietly along vertical cables that are mounted to the outside of a door or window frame. These cables prevent blinds from swaying, making this solution ideal for doors or areas of heavy airflow.

Architectural honeycomb blinds

Triathlon Architectural Honeycomb blinds headrail and hembar design and update fabric options.

Modernised headrail and hembar

Crafted from the same premium metals, the reimagined headrail and hembar produce a polished, uniform appearance. A precision-fit back cover, integrated into the headrail design, reduces light leakage to improve natural light control.

Updated fabric options

Larger cell size gives an updated look to the classic honeycomb style. Fabrics available in collections of full-range neutrals, decorative prints, and rich textures.

Honeycomb fabrics

Sheer**

- Daylight transmits through the fabric
- Fabric allows views to the outside

Light-filtering*

- Daylight transmits through the fabric
- Fabric limits views to the outside

Room-darkening**

- Completely blocks light through the fabric
- Completely blocks view to the outside

*Available in single- or double-cell options
**Available in single-cell style

ROMAN BLINDS

Roman shading system

Roman blinds give you the advantage of using your own material while still reaping the benefits of Lutron technology. Work with your local Lutron blind specialist to achieve the ultimate design for your space — from the perfect fabric to the number of pleats.

All Lutron Roman blinds are made with Customer's Own Material (COM) to allow your window treatments to coordinate with the interior's other textiles and furnishings.

Precision control

Like the other styles of Lutron blinds, Romans feature intelligent hembar alignment, which synchronises all blinds/window coverings in one room or throughout a home.

Control styles

Choose between keypad styles to coordinate with each room and any home.

Lutron fabric collections

Our fabric offering is curated from leading fabric suppliers all over the world to provide high-quality, fashionable window treatments. With over 1,000 materials to choose from, there is a solution for every application and design aesthetic.

The Classico Collection

The Classico Collection of performance fabrics is available for roller, tensioned, and cable-guided blinds.

The Gallery Collection

The Gallery Collection is an extensive line of fashion fabrics for roller blinds, horizontal sheer blinds, and wood blinds.

The Atelier Collection

The Atelier Collection is a curated collection of roller blind fabrics that balances design and function. The collection is organised by colour, and each deck includes select colours for the fabric family. In this collection, each sheer fabric has a perfectly coordinating blackout option for simple specification.

Battery Wood Binds Collection

A curated selection of painted and stained wood blind slat samples, including head rail options.

Lutronfabrics.com

Browse through Lutron's extensive collection of window blind fabrics using this comprehensive tool. Easily search for fabrics that meet specific blind parameters or find inspiration for your next project by looking through our fabric Photo Gallery. Professionals can stay up to date on all fabric announcements and changes by logging into lutronfabrics.com using your myLutron account — you can even sign up to receive automatic email notifications when changes occur.
